

## Serial sections of brains in the Stephan collection

| <i>Species</i>                    | Coronal<br>n | Sagittal<br>n | Horizontal<br>n |
|-----------------------------------|--------------|---------------|-----------------|
| <b>Insectivora</b>                |              |               |                 |
| <i>Solenodon paradoxus</i>        | 3            | 1             |                 |
| <i>Tenrec ecaudatus</i>           | 4            | 2             | 1               |
| <i>Setifer setosus</i>            | 4            | 2             | 2               |
| <i>Hemicentetes semispinosus</i>  | 3            | 1             |                 |
| <i>Echinops telfairi</i>          | 3            | 2             | 1               |
| <i>Oryzorictes talpoides</i>      | 1            |               |                 |
| <i>Microgale cowani</i>           | 1            |               |                 |
| <i>Microgale dobsoni</i>          | 2            | 1             |                 |
| <i>Microgale talazaci</i>         | 3            | 2             |                 |
| <i>Limnogale mergulus</i>         | 1            | 1             |                 |
| <i>Potamogale velox</i>           | 6            | 2             | 1               |
| <i>Micropotamogale lamottei</i>   | 1            |               |                 |
| <i>Micropotamogale ruwenzorii</i> | 4            |               |                 |
| <i>Chrysochloris asiatica</i>     | 1            |               |                 |
| <i>Chrysochloris stuhlmanni</i>   | 3            | 2             | 1               |
| <i>Chlorotalpa leucorhina</i>     | 1            |               |                 |
| <i>Echinosorex gymnurus</i>       | 3            | 1             |                 |
| <i>Hylomys suillus</i>            | 1            |               |                 |
| <i>Aethechinus algerus</i>        | 5            | 2             |                 |
| <i>Erinaceus europaeus</i>        | 7            | 1             | 2               |
| <i>Hemiechinus auritus</i>        | 2            | 3             |                 |
| <i>Sorex alpinus</i>              | 3            | 1             |                 |
| <i>Sorex araneus</i>              | 8            | 2             | 2               |
| <i>Sorex cinereus</i>             | 3            | 1             |                 |
| <i>Sorex fumeus</i>               | 2            |               |                 |
| <i>Sorex minutus</i>              | 5            | 1             |                 |
| <i>Microsorex hoyi</i>            | 3            | 1             |                 |
| <i>Neomys anomalus</i>            | 3            | 1             |                 |
| <i>Neomys fodiens</i>             | 4            | 1             |                 |
| <i>Blarina brevicauda</i>         | 3            | 1             |                 |
| <i>Cryptotis parva</i>            | 3            | 1             |                 |
| <i>Crocidura attenuata</i>        | 1            |               |                 |
| <i>Crocidura flavescens</i>       | 4            | 5             | 1               |
| <i>Crocidura hildegardeae</i>     | 4            |               |                 |
| <i>Crocidura jacksoni</i>         | 1            |               |                 |
| <i>Crocidura russula</i>          | 7            | 1             |                 |
| <i>Crocidura suaveolens</i>       | 3            |               |                 |
| <i>Suncus etruscus</i>            | 3            | 1             |                 |
| <i>Suncus murinus</i>             | 4            | 2             |                 |
| <i>Sylvisorex granti</i>          | 3            | 1             |                 |
| <i>Sylvisorex megalura</i>        | 3            | 1             |                 |
| <i>Ruwenzorisorex suncooides</i>  | 1            |               |                 |
| <i>Myosorex babaulti</i>          | 1            |               |                 |
| <i>Anourosorex squamipes</i>      | 4            | 1             |                 |
| <i>Scutisorex somereni</i>        | 3            | 1             |                 |
| <i>Desmana moschata</i>           | 2            | 1             |                 |
| <i>Galemys pyrenaicus</i>         | 2            | 2             | 1               |
| <i>Talpa europaea</i>             | 6            | 1             |                 |
| <i>Talpa micrura</i>              | 1            |               |                 |

| <i>Species</i>                   | Coronal<br>n | Sagittal<br>n | Horizontal<br>n |
|----------------------------------|--------------|---------------|-----------------|
| <i>Parascalops breweri</i>       | 3            | 1             |                 |
| <i>Scalopus aquaticus</i>        | 1            |               |                 |
| <b>Scandentia</b>                |              |               |                 |
| <i>Tupaia glis</i>               | 111          | 4             | 3               |
| <i>Tupaia minor</i>              | 1            |               |                 |
| <i>Urogale everetti</i>          | 1            | 1             |                 |
| <b>Chiroptera</b>                |              |               |                 |
| <i>Eidolon helvum</i>            | 3            |               |                 |
| <i>Rousettus aegyptiacus</i>     | 2            |               |                 |
| <i>Rousettus amplexicaudatus</i> | 2            |               |                 |
| <i>Rousettus leschenaulti</i>    | 1            |               |                 |
| <i>Myonycteris torquata</i>      | 3            |               |                 |
| <i>Pteropus alecto</i>           | 2            |               |                 |
| <i>Pteropus conspicillatus</i>   | 1            |               |                 |
| <i>Pteropus lylei</i>            | 4            | 2             | 1               |
| <i>Pteropus mahaganus</i>        | 1            |               |                 |
| <i>Pteropus poliocephalus</i>    | 2            |               |                 |
| <i>Pteropus scapulatus</i>       | 2            |               |                 |
| <i>Pteropus temmincki</i>        | 1            |               |                 |
| <i>Pteropus tonganus</i>         | 3            |               |                 |
| <i>Pteropus vampyrus</i>         | 2            |               |                 |
| <i>Dobsonia inermis</i>          | 3            |               |                 |
| <i>Dobsonia moluccensis</i>      | 2            |               |                 |
| <i>Dobsonia spec?</i>            | 3            |               |                 |
| <i>Dobsonia praedatrix</i>       | 3            | 1             |                 |
| <i>Hypsignathus monstrosus</i>   | 1            |               |                 |
| <i>Epomops franqueti</i>         | 3            |               |                 |
| <i>Epomophorus labiatus</i>      | 3            |               |                 |
| <i>Micropteropus pusillus</i>    | 3            |               |                 |
| <i>Scotonycteris zenkeri</i>     | 3            |               |                 |
| <i>Casinycteris argynnis</i>     | 4            |               |                 |
| <i>Cynopterus brachyotis</i>     | 3            |               |                 |
| <i>Cynopterus horsfieldi</i>     | 3            |               |                 |
| <i>Cynopterus sphinx sphinx</i>  | 2            |               |                 |
| <i>Megaerops ecaudatus</i>       | 2            |               |                 |
| <i>Chironax melanocephalus</i>   | 3            |               |                 |
| <i>Sphaerias blanfordi</i>       | 4            |               |                 |
| <i>Balionycteris maculata</i>    | 2            |               |                 |
| <i>Nyctimene albiventer</i>      | 2            |               |                 |
| <i>Nyctimene major</i>           | 3            |               |                 |
| <i>Nyctimene robinsoni</i>       | 2            |               |                 |
| <i>Paranyctimene raptor</i>      | 3            |               |                 |
| <i>Eonycteris spelaea</i>        | 4            |               |                 |
| <i>Megaloglossus woermanni</i>   | 3            |               |                 |
| <i>Macroglossus minimus</i>      | 2            |               |                 |
| <i>Macroglossus sobrinus</i>     | 4            |               |                 |
| <i>Syconycteris australis</i>    | 1            |               |                 |
| <i>Syconycteris crassa</i>       | 3            |               |                 |

| <i>Species</i>               | Coronal<br>n | Sagittal<br>n | Horizontal<br>n |
|------------------------------|--------------|---------------|-----------------|
| Melonycteris melanops        | 3            |               |                 |
| Nesonycteris woodfordi       | 3            |               |                 |
| Notopterus macdonaldi        | 3            |               |                 |
| Rhinopoma hardwickei I       | 2            |               |                 |
| Rhinopoma hardwickei II      | 1            |               |                 |
| Rhinopoma microphyllum I     | 2            |               |                 |
| Rhinopoma microphyllum II    | 3            | 1             |                 |
| Emballonura beccarii         | 3            | 1             |                 |
| Emballonura monticola        | 3            |               |                 |
| Emballonura nigrescens       | 3            |               |                 |
| Emballonura semicaudata      | 3            |               |                 |
| Coleura afra                 | 3            |               |                 |
| Rhynchonycteris naso         | 3            |               |                 |
| Saccolaryx bilineata         | 4            |               |                 |
| Saccolaryx canescens         | 1            |               |                 |
| Saccolaryx leptura           | 3            |               |                 |
| Cormura brevirostris         | 3            |               |                 |
| Peropteryx macrotis          | 3            |               |                 |
| Peropteryx trinitatis        | 3            |               |                 |
| Taphozous australis          | 2            |               |                 |
| Taphozous hildegardeae       | 3            |               |                 |
| Taphozous mauritanus         | 2            |               |                 |
